

maxiRACK

max VALUE

max CAPACITY

max STRENGTH

ute racks have been manufactured by Jaram since 1975. Maxi Racks are structurally designed for the heavy duty end of the industry. They are the result of expert design, strong bracing techniques and sturdy/accurate mounting systems. This means they strike the perfect balance of strength and durability. Available in both aluminium & steel.

MR AL01

WELL BODY SINGLE CAB

Very heavy duty commercial rack made from steel or aluminium. Rack runs from rear of vehicle to front windscreen. Available for both dropside wellbody utes.

MR AL04

WELL BODY FLAT TOP

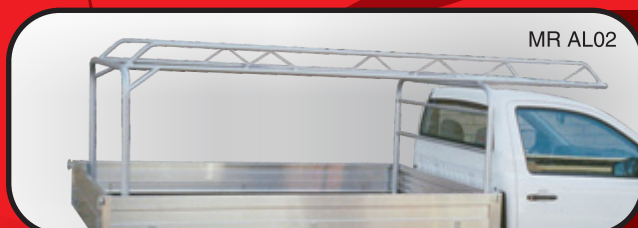

Very heavy duty rack made from steel or aluminium. No raised side rails allowing greater load carrying flexibility for items such as gyprock sheeting. Strong tie down rail.

MR AL03

WELL BODY DUAL CAB

Very heavy duty commercial rack made from steel or aluminium. The rack runs from the rear of the vehicle to half the cab length.

MR AL02

TRAY BACK SINGLE CAB

Very heavy duty commercial rack made from steel or aluminium. Rack runs from rear of vehicle to front windscreen. Available for dropside wellbody utes.

MR AL07

DUAL CAB WELL BODY FULL RACK

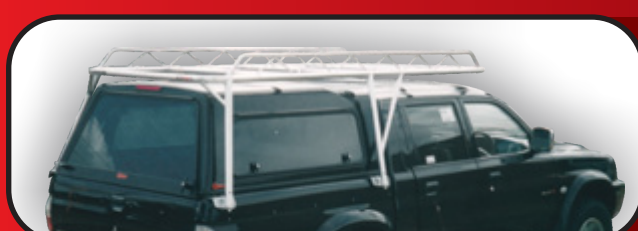

Rack runs from rear off vehicle to front windscreen and includes extra bracing to support cab overhang. No attachment to cab required. No movement through cab & tray. Available for both dropside and wellbody utes. Special mounting brackets allow normal use of tray cover.

CF 01

PROFILED CANOPY FRAME

Peaked centre assists water run off and rear mounting uprights profiled so canvas fits flush with outside of tray. Specially rolled corners on each side provide a gentle curve which protects the canvas from unnecessary wear and tear and give a quality profiled appearance. Can be built to take convenient load carrying cross bars or Maxi Racks as shown on this brochure.

OVER FIBREGLASS CANOPY

Maxi Racks can be made to fit over fibreglass canopies. However it must be mentioned that the vehicle has a canopy, as this may effect pricing and size.
